DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Applicant is required to make a single election from each of the following Species A, B, and C.

Specie A

The model is proposed using

A1: an evolutionary algorithm (claims 2 and 23)

A2: genetic programming or a genetic algorithm (claims 3 and 24)

The species are independent or distinct because of the usage of the distinct types of algorithms. The distinct species are separately described in literature thus demonstrating an undue burden of search if all species are searched together.

Currently, claims 1, 4-22 and 25-42 are generic.

Specie B

Species of nodes as presented in claims 12-14, 16-18, 33-35 and 37-39 are distinct. These species are separately described in literature thus demonstrating an undue burden of search if searched together. Applicants are to elect one node or combination of nodes as set forth in claims 33-35 and 37-39.

Currently, claims 1-11, 15, 18-21, 22-32, 36 and 40-42 are generic.

Specie C

Species of data representative of measured biological behavior as presented in claims 19, 20, 40 and 41 are distinct. These species are separately described in literature thus demonstrating an undue burden of search if searched together.

Applicants are to elect one type of data representative of measured biological behavior or combination of nodes as set forth in claims 19, 20, 40, and 41.

Currently, claims 1-18, 22-39 and 42 are generic.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1631

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
